Game Guide of "Dungeon of Dragon Knight"

The gameplay of "Dungeon of Dragon Knight" is based on the genre "Instant Dungeon RPG from the First-person Perspective," also known as Dungeon Crawler, which emerged in the 1980s. Based on the real-time movement of the grid, this kind of game fully integrates the strategic and operational sense into the combat and puzzle solving, thus forming its unique style of hand feeling and fun.

This game emphasizes exploration and puzzle solving. Players are trapped in labyrinths, and must avoid a various number of traps. At the same time, they need to fight against a variety of underground horrors to solve complex and interesting puzzles. Because only in this way can they go deeper into the dungeon, revealing the mystery of it.
